There is a saying that cats rule the internet. AND THEY DO! Cats, since ancient times, have been worshipped and honored with the most vivid of examples being from Egypt where there have been architectural designs based off of cats. And as for memes, memes are a glimpse into internet history through internet culture/slang. They are a product of their times and open the eyes of the viewers to what events were going on back then.

Our archive was planned to be longer, but we found out what not to do with images. So here is our shorter work on a small social history archive of cat memes.
